

My comment is about LPFM and the proposed changes for new LPFM station to take priority over current FM translator service. I listen to two of the existing LPFM stations (95.3 and 96.3) in Lexington, Kentucky. 95.3 broadcast the programming of AIR 1 and 96.3 broadcasts the programming of K-LOVE, these stations serve me as a resident of my local community. The effect on the local community if AIR-1 and K-LOVE were displaced by an LPFM providing other programming would mean that the thousand of people would loose a clean and positive programming choice. 95.3 and 96.1 provide an alternate to the unsuitable and not family friendly programming that airs on the other stations. Our community needs more station like AIR-1 and K-LOVE not less.
